

Basa Sricharan

AI/ML Engineer and GenAI Developer

munnasricharanbasa@gmail.com | +91 9063322435 | Hyderabad, India | DOB: 21-07-2003
| [linkedin.com/in/basa-sricharan/](https://www.linkedin.com/in/basa-sricharan/)

Summary

A passionate **AI/ML Engineer** and **GenAI Developer** with a **Computer Science** background and hands-on experience building end-to-end **AI solutions**. Expert in NLP, Deep Learning, Generative AI, Agentic AI, RAG pipelines, AWS and GCP.

Work Experience

AI/ML Trainee

CPS IT Technologies LLP | Hyd

Dec 2025 - Present

- Managed team initiatives with **5 members**, resulting in a **15% improvement** in **team collaboration**, reduced project completion time by **10%**, and improved overall efficiency by **25%**, **delivery of 3 major projects on schedule**.
- Built and deployed complete **AI solutions**, including **NLP Sentiment Analysis** and **Real-Time Accident Detection and Response System**, achieving at least **95% accuracy** and reducing response time by **30%**, resulting in a **20% increase in user satisfaction**.
- Implemented **Python, ML, DL, Generative AI, RAG**, and **LLMs** on AWS and GCP, resulting in a **30% increase in system scalability**.

Skills

Java, Python, Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Agentic AI, RAG Pipelines, LLMs, TensorFlow, PyTorch, Scikit-learn, Keras, Hugging Face, NLTK, Transformers, FastAPI, RestAPI, Jupyter, Visual Studio, Git, GitHub, React.js, Pandas, NumPy, Matplotlib, AI orchestration frameworks, Multi-agent systems and orchestration of LLM-enabled actions, Seaborn, Plotly, MySQL, AWS, GCP

Project Experience

NLP Sentiment Analysis

- Engineered an **end-to-end NLP pipeline** for sentiment analysis using the IMDB dataset from **Hugging Face**, processing over **10,000 reviews**, which resulted in a **25%** increase in analysis speed.
- Classified movie reviews as positive or negative using the **Transformers** library and **Scikit-learn**, achieving a **15%** improvement in model performance, enabling real-time sentiment tracking for **450+ user reviews** daily.
- Implemented Data Ingestion, Data Preprocessing, Feature Engineering (**TF-IDF, Bag of Words**), Model Training, Prediction and Analysis, achieving **92% accuracy** in classification across **5 different datasets**.
- Tech Stack:** Python, NLP, Hugging Face, Scikit-learn, Transformers, Pandas, NumPy, Jupyter Notebook

GenAI Chat Application with Ollama LLM

- Constructed a **GenAI-powered chat application** using **React.js** and **FastAPI** integrated with Ollama LLM, handling **100+ user queries** with real-time AI-driven responses.
- Coordinated scalable cloud architecture on AWS (**S3 for frontend, EC2 for backend**), enabling **FastAPI-based LLM inference** and prompt processing, **reducing latency by 20%**.
- Tech Stack:** React.js, FastAPI, Ollama LLM, AWS S3, AWS EC2, Python, CORS, venv

Achievements

- Received appreciation and **selected among 150+ participants** at the **UMAGINE TN Global Conference 2024**, contributing to a panel discussion that engaged over **500 attendees**.
- Awarded multiple scholarships** for achieving **98%** among **70+ students**, Higher Secondary School 2021.

Education

B.Tech in Computer Science Engineering | CGPA - 9.41
Bharath University, Chennai

2021 - 2025
